

SDCE Mopar Supercharger Systems

Superior Quality • Proven Performance Since 1995

Horsepower Happens Here...

Since pioneering the Mopar Supercharger system back in 1995, our systems have grown to include new bracket designs and components to accommodate from 300 horsepower to 1500 horsepower—all on 8 or 12 rib drive. No cog drive or crazy gear drive systems needed. Our small block and big block Chrysler supercharger systems will fit any 8 cylinder carbureted or fuel injected Chrysler application.

Kit features

Passenger side blower mount eliminates driver's side clutter

Our kits come standard with custom bracketry and crank pulley specific for your Chrysler to assure a perfect fit

ZERO BELT ISSUES! Simply put, our spring tensioner system drastically reduces belt replacement when using our tensioner system.

Support braces are included with our system to eliminate any bracket flex.

Applications

A Body 1963-1976

B Body 1962-1974

C body 1965-1975

E Body 1970-1974

Available Systems

System 1 (400-450HP).....\$2999.95

System 2 (450-580HP).....\$3995.59

System 3 (580-650HP).....\$4295.12

System 4 (650-875HP).....\$5250.50

System 5 (800-1000HP).....\$CALL

System 6 (1000+ HP).....\$CALL

Our Challenger has been our prototype vehicle for all of our supercharger systems. Back in 1995, it originally started as a small block 360cid with a P600B blower. It has since morphed into a big block car running 8.50's at 158 mph using one of our custom big block blower kits.
