FINAL ISSUE

OF THE 1966 PASSENGER CAR

PARTS CATALOGUE

This Final Publication of the 1966 "B" Series Passenger Car Parts Catalogue contains all parts information for 1966 Model Passenger Cars. In the event replacement parts that are not listed are required, they may be ordered by description or part type code, giving the Model and Serial No. of the vehicle that they may apply.

We have added several new illustrations covering different assy's, we also list the effective serial number points where these assemblies entered production.

The 1966 Vehicle Serial Number have 2 more characters than previous models, the 2 extra digits incorporates the body style (example 41 for 4 door sedan) into the serial number. We suggest that you familiarize yourself with pages 2 to 9 of the information section of the catalogue, this will give you complete data for the vehicle you may require replacement parts.

Be fully informed, instructions for use of parts catalogue is explained on INF: 10 of the information section, it is strongly recommended that it should be read carefully by all parts personnel. This catalogue will only be of value to the partsman who will learn to rapidly locate and determine the parts needed for a particular vehicle.

The enclosed catalogue will replace your prior 1966 "B" Series Catalogue, we request that before putting your new catalogue into use, that all existing copies of WM 4701 and WM 4723 be destroyed.

ENGINE IDENTIFICATION NUMBERS

The following chart provides examples of identification numbers of all 1966 engines, and the location of the boss on which the engine number is stamped.

Example:

B
Series

361
Cu. In. Displacement

8-1
Date Built

* 2

* If a number appears after date built, this is for internal purposes only. When requesting engine information supply all numbers shown in this location.

On the 426 Cu. In. engine only the letter "H" following the series denotes "hemispherical" and the letters "B" or "C" following Cu. In. displacement denotes body type.
